2

Choosing a Comfortable Work Space

Choose a work space for your computer near a grounded electrical wall outlet.

If you have a tilt-swivel, attach it to the display as described in the display manual. Refer to your display documentation to make sure it is firmly attached.

Position the display on your desk.

Position the computer to allow proper ventilation and access to the cables.

SAFETY WARNING

If you are in any doubt about whether you can lift the equipment safely, do not try to move it without help.

Please read carefully the relevant sections in your HP Brio PC's documentation for safety instructions relating to: unpacking and setting up your display, electrical connections and/or telephone connections.

REGULATORY, WARRANTY AND SOFTWARE LICENSE INFORMATION

Please read carefully the relevant sections in your HP Brio PC's documentation.

3

Connecting Mouse, Display & Keyboard

Insert the display connector into the back of the computer, as shown. You may also have to connect the display cable to the display, depending on your model.

Please note that all connectors are shaped to go in one way only.

Insert the mouse and keyboard connectors into the back of the computer, as shown in the illustration.

4

Connecting an External Device (Printer, Scanner etc)

Insert the device connector into the back of the computer, as shown in the illustration.

 This is the label for the serial socket. If you have a serial device, connect it to this socket.

 This is the label for the parallel socket. If you have a parallel device, connect it to this socket.

 This is the label for the Universal Serial Bus socket. If you have a USB device, connect it to this socket.

5

Connecting Your Audio Equipment (optional)

This is the label for the microphone socket. If you want to use a microphone with your HP Brio PC, plug it into this socket.

This is the label for the audio line in socket. Connect other audio line in sources to this socket.

This is the label for the headphone socket. If you have headphones, plug them into this socket.

HEADPHONES

LINE IN

MICROPHONE

6

Connecting to Your Telephone Socket (optional)

Connect the telephone cable to the modem on the back of your computer, using the most appropriate configuration.

7

Connecting to a LAN (optional)

Connect the LAN cable to the back of your computer. The exact position of the LAN card may differ from the one shown.

Connect the other end of the LAN cable to your LAN.

8

Connecting the Power Cords

Check that the voltage of your computer is set to the correct value for the country that you are in.

The voltage is displayed on the back of the computer, close to the computer power socket.

Connect the power cords to the computer and display as shown in the illustration.

Plug both cords into grounded electrical outlets.

9

Starting up the Computer for the First Time

Turn on the display first, and then the computer. This is to ensure that the computer can detect the display and adjust itself to the best settings.

1. TURN ON THE DISPLAY

2. TURN ON THE COMPUTER

10

Welcome to Your Computer (only models with HP Brio Center)

Once you have started up your computer, double-click on the HP Brio shortcut on the desktop to launch the HP Brio Center.

The HP Brio Center lets you get the most out of your PC, quickly and efficiently. Depending on your region, here are some of the things you can do from your HP Brio Center:

- register your HP Brio PC
- take a guided tour of your HP Brio PC
- view on-line help
- perform troubleshooting
